Publications

Goldstein LB, Despa F. Amylin Dyshomeostasis Hypothesis, small vessel-type Ischemic stroke in teh setting of Type-2 Diabetes. *Stroke*. 2021 E244-E249.

Invited Panelist

International Think-Tank - WHAT NOW

Dong "Dan" Han, PsyD, discussed the future of neuro-science, health, and research and development for food technology of chocolate.
Invited Speaker
UK Department of Family Medicine Annual Family Medicine Review

Jessica D. Lee, MD, presented, Perils of the Pandemic, Part 2. "Stroke and COVID 19: What we've learned and where we are going."

Grants

Larry Goldstein, MD. UK received a three year CDC Coverdell award to optimize stroke prevention and care and outcomes in Kentucky. Lead partners are the Kentucky Department of Public Health and University of Louisville.

Ann Stowe, PhD
Neilson Foundation Award
NIH R01 renewed
Faculty Achievements

Jessica D. Lee, MD, completed the six month Health-Care Executive Leadership Program in May. She was one of 4 individuals selected as winners of the graduation project. They were required to develop a process improvement and simplified failure modes effect analysis map. Dr. Lee’s project was on scheduling stroke patients for follow-up in the KNI post-acute care discharge.

Dr. Lee was also invited to serve on the K-CATS (Kentucky Centralized Access and Transfer System) Physician Advisory Group, which will meet quarterly to review and improve transfer workflows and protocols. She was selected as one of the new Clinical Documentation Integrity physician specialists, to start in July. This will initially involve mortality case reviews for UK HealthCare but the hope is to expand into more real time chart documentation review.

Jordan Harp, PhD, received the Outstanding Community Supervisor award from the UK Department of Psychology. Dr. Harp received this award for his contributions to clinical training of students in the Clinical Psychology PhD program for the neuropsychology graduate students.

Padmaja Sudhakar, MD, has been selected to serve as a representative on the KMSF Board of Directors.

Jay Avasarala, MD, PhD, was appointed to the MS International Federation Essential Medicine project representing the American Academy of Neurology.
Faculty Achievements Cont.

Meriem Bensalem-Owen, MD, was invited to join the Review Committee of the *African & Middle East Epilepsy Journal*, the official journal of the East Mediterranean Regional Committee of the International Bureau of Epilepsy (IBE).

Kevin O'Connor, MD, was accepted for the American Academy of Neurology's 2021 Palatucci Advocacy Leadership Forum in October.

Faculty Awards

Zabeen Mahuwala, MD, and the UK Neurology Wellness Committee won the Booster Award for Women in Medicine and Science. The award was for a project to compare burnout among women in College of Medicine by department and assess the impact of a wellness program within Neurology.

Padmaja Sudhakar, MD, was a finalist for the University of Kentucky 2021 Outstanding Teaching Award.
Alumni Awards

Staff Awards

Rachel Ward-Mitchell, RN, BSN, received the Saha Patient-Center Care Award.

Alumni Welcome

Emily Justusson, MD, and her husband, are the proud parents of Elizabeth May Riddle, born June 17 at 9lbs 3 oz. Congratulations
Trainee Achievements

Paige Sutton, MD, and Neil Toupin, MD, were both finalists for the Saha Award in the resident and fellow section. Sally Mathias, MD, Associate Program Director, wrote, "it is truly an honor to have 2 neurology residents among 4 finalists for the resident and fellow award among nearly 950 residents plus several more fellows within UK."

Dana Ionel, DO, PGY 4, Gabriella Keeton, MD, PGY 4, and Eric Miller, MD, PGY 4, were all selected for the UK GME Emerging Leaders Program.

Staff Achievements

Dawn Baker, Clinical Research Coordinator, was elected to serve as a Staff Senator. Congratulations!
Graduation Awards

Faculty, Trainee, and Staff

Program Directors' Award: Dr. Paige Sutton

Resident of the year: Dr. Kyle Darpel

Best Resident Teacher award of Medical Students. Dr. Eric Miller

Highest RITE score 2021: Dr. Julie Zhou

Best resident research day presentation award:
Best platform presentation: Dr. Tarek Ali

Best resident research day presentation award: Best poster presentation:
Dr. Wenyang Li and Dr. Fawad Yousuf

Resident liaison for medical students. Jason Chisholm

Excellence in clinical care: Dr. Neil Toupin

Outstanding faculty teaching award: Dr. Padmaja Sudhakar

Outstanding faculty mentor award: Dr. Padmaja Sudhakar

Outstanding staff award: Ms. Margie Campbell

PROSE award (Peer Recognition of Outstanding Service to Education):
Dr. Zain Guduru
Departmental Trainee of the Month - May

Omar Al Janabi, MBChB, PhD

Collective Responsibility/Teamwork:
“Dr. Al-Janabi actively communicates with consulting teams throughout the day, creating an open line of communication to promote interactive and dynamic decision-making plans for these patients. I was very impressed and thankful for this, as I am sure the consulting teams were as well.”

“When his co-resident received stroke alert pages on several patients back-to-back, he offered to stay to support his co-resident.”

“Dr. Al-Janabi has always been very thorough with his patient care and always incorporates feedback and constructive criticism. He is a role model for his peers.”

Caring/Excellence:
“I am very impressed by his work ethic, his excellent communication with families and consulting providers, his clinical judgement, and the responsibility he takes to ensure the best care for his patients.”

“I noticed many times when he was seeing ED consult patients, he made a point to go to the waiting room to inform families of their patients’ status.”

“He is very detail-oriented in managing the patients. He is proactive in their treatment plan and invested in their care.”

“The feedback for his performance on stroke service was nothing but glowing. He has volunteered to be part of an Enterprise QI project surrounding timely completion of MRIs, particularly as it affects our stroke population.”

“He definitely goes above and beyond in many different aspects. He is doing an excellent job. I am looking forward to seeing his continued development over the next two years. I have not a doubt he will be an exceptional neurologist.”
Gary Cornell, Associate Administrator, Department of Neurology and Neurosurgery, received 2 GOLD awards from The Star Program. Dr. Ibraheem nominated him for Compassion. Dr. Ibraheem's kind words were printed in the April edition of the Neurology Newspaper.

Gary also received a GOLD Star from Renee Wagner, Research Protocol Manager for KNI, nominated him for Teamwork.

Renee wrote this about Gary: "Gary is always here and ready to assist whenever needed. He wears many hats for the department and takes on a variety of different tasks to accomplish the mission. If an office needs to be moved and no one else is available to do so, Gary moves them. Need a report, Gary will provide it. Need to hire staff, Gary's there to accomplish the hiring. No job is too big or too small. Need to vent, Gary will listen. While others worked remotely during the COVID-19 pandemic, Gary was here everyday keeping the department going. It's well known in the department, if you need something, go see Gary. He will get it done or find the correct person to assist to solve the issue. Gary is the GO TO GUY!"

Maryam Mosharraf, APRN, received a nice compliment from a patient's mother, "Maryam is awesome. She addressed right away K---'s medication issues. She was very professional, and super sweet. She really cares about patients".
Jennifer Vice, PA-C, received a very nice compliment from Dr. Mam Ibraheem who wrote: "I would like to express my sincerest appreciation and gratitude to my colleague, Ms. Jennifer E. Vice for her “Exceptional Performance” on the General Neurology Service. I have been working closely with Jen over the last few months. I critically value her competence and caring style. On last Thursday and Friday, the General Neurology Service experienced critical coverages lapse at Good Sam hospital. I was the attending on service at UK-Chandler. Our GSH PA was on well-deserved vacation days and we were not able to mobilize any resident to help out at Good Sam secondary residency turnover, logistics, and residents’ understaffing per the residency leadership. Jen has been still rotating at UK Chandler with my team. I reached out to Jen directly and she immediately stepped out. Not only she continued to see 3 consults at UK-Chandler; but, she went to Good Sam and ended seeing additional total 7 consults at Good Sam independently with my supervision on a single day on last Friday, May 21, 2021 (So Total 10 Consults on a Single Day)! I am very impressed with Jen’s ability to manage practical neurology presentations competently. She knows her limitations and when to seek further help. She is always in “Thriving Mode” to learn more while interacting with me, as the attending. I highly value her attentiveness, reliability, and collaborative relaxed teamwork. She is dependable. I highly value her focused brief relevant verbal presentation and I critically appreciate her amazing thoughtful detailed chart documentations and excellent communication skills."

Neurology Team Kudos

A patient submitted a compliment regarding his father's care: "My father has senile dementia. My mother has to call Neurology from time to time for advice and assistance. Dr. King’s nurse, Becca, has always gone beyond the call of duty to help my mother whenever she calls. While everyone in Neurology has been very helpful and kind, Becca has been that one stand out employee that shows why UK is the best hospital in Kentucky and why we transferred my father from another local hospital to UK for healthcare."
KNI Kudos

Ambulatory Leadership

From Daniel Lee, MD:
"I would like to take this opportunity to thank KNI leadership, Dean Hanlon, Stefanie Stephens, and Rebekkah Cohelia, for taking time away from their families on a beautiful weekend working on Epic at KNI on our behalf. They spent 8 hours yesterday and another 8 hours today manually entering all of our clinic appointments into the Epic system for the next 3 months. Please take a moment to thank them when you see them this week. There are plenty of times that they are working quietly behind the scene helping all of us to facilitate our patient’s care. They have families to take care of like all of us. This will mean a lot to them when acknowledging how grateful we are for them going the extra mile. I am grateful to have such a wonderful team."

Faculty and Staff Kudos

Kim Jones, MD, and Amanda Castro, RN, BSN, received a nice compliment from a patient's mother through the grateful patient program. She wrote, "I would like to express my gratitude and overwhelming appreciation for the care that my daughter has received at UKHC over the past 2 months. She was admitted to KCH-4N on the Child Neurology service where her team of nurses and doctors, (special appreciation to Dr. Jones and Amanda Castro, child nurse coordinator), who did an amazing job explaining the reasons behind tests and her diagnosis on a level she understood. They never made her feel judged or dismissed her."
Seen and Heard

Recent graduate, Jason Chisholm, MD, and Ima Ebong, MD, were featured in an article titled, "Neurology Training Steps Up to Focus on Racism and Social Injustice," in Neurology Today. Click here to read the story.

Zain Guduru, MD, was featured in UKNow in an article entitled, "Kentucky Native Battles Rare Neurological Disorder After Cancer." Click here to read.

Meriem Bensalem-Owen, MD, was featured alongside her FINDERS Alliance co-chair, Brian Gold, in the "From the Dean's Desk" weekly newsletter. Click here to read the article.

Dong (Dan) Han, PsyD, was interviewed for a full feature on Blueprint, by ABC Radio National (Australian Broadcasting Corporation), discussing the neuroscience of food. Click here to read the article.

Dr. Han was the invited feature writer for the June UKNow health column and for KY Living on the topic of COVID-19: Smell, Taste, and Recovery of Flavor. Click here to read.
Philanthropy

Robert J. Baumann, MD
Resident Endowment Fund

The endowment was established in honor of Dr. Baumann’s skills as a clinician and educator. It provides much needed funding for resident learning opportunities and research-related needs that are not otherwise supported.

Education is one of the core missions of our department - we are always looking for ways to improve the curriculum and educational opportunities we provide. Our goal is to continue to attract the highest caliber trainees to our programs, provide comprehensive neurological education, and increase the number of neurologists available in the commonwealth capable of providing cutting edge patient care and who are dedicated to life-long learning. In 2015, the Robert J. Baumann, MD Fund for Neurology Residents was established to help us support our goals for the neurology resident program. Dr. Baumann has been a familiar face among neurology residents at the University of Kentucky for four decades. Dr. Baumann truly embodies the teaching mission of our department. His devotion to the field of medicine and training the next generation of providers is truly second to none.

In keeping with Dr. Baumann’s passion for providing a strong medical education, the endowment will bolster the continued expansion of the Residency Program and ensure that our trainees have a well-rounded experience, positioning us to be among the best, and most sought out programs in the United States. Please consider contributing to the continued growth of our program and making an impact on future neurology residents by making a gift to the Robert J. Baumann MD Fund for Neurology Residents. All donations will be acknowledged and are tax deductible.

Donations can be made by contacting our Director of Philanthropy, Lisa Deaton Greer. (859-323-5374 or lisa.greer@uky.edu) or by clicking here https://neurology.med.uky.edu/neurology-alumni.

Diversity & Inclusion

Statement for Equity, Diversity, and Inclusion

As healthcare providers, we have an obligation to do no harm. But our obligations go further to prevent harm from befalling others because of our inaction or silence. We can no longer be idle while the current institutions and implementations of racism that perversely impact remains intact. Silence for the sake of avoiding an uncomfortable truth is not acceptable and it was never acceptable. Inoffensive to racism makes as complicit in systems that have oppressed marginalized and scapegoated people for generations. In a country long heralded as the land of the free, being black or a member of an underrepresented minority group cannot be a qualification for enjoying the rights and privileges afforded to others.

Racism and social injustice in the United States claim the lives of George Floyd, Breonna Taylor, Ahmaud Arbery, and countless others of color. Breonna Taylor, a fellow Kentuckian, UK alumna, and healthcare provider, died at the hands of people who were supposed to be keepers of the peace. Violence is but one facet of the chronic and pervasive racism that has plagued our communities. Medicine is not immune to the consequences of society’s inequalities; they affect us, our colleagues, and our patients and impair our ability to provide comfort and care. As healthcare providers, we begin addressing symptoms such as implicit bias and healthcare disparities by recognizing that they stem from hundreds of years of oppression.

We proudly stand with other members of the medical community and proclaim Black Lives Matter. We stand with the people of color and others in our community and across the United States in denouncing the abhorrent treatment that Black people, other persons of color, and other underrepresented groups have endured. We stand with others who pledge to be antiracist and who work to transform the pillars of institutional racism. As a Department, UK Neurology is committed to equity, diversity, and inclusion. With only 7% of Neurologists being Black or African American and only 7% Hispanic/Latino, it is an effort to counter decades of neglect, we commit to recruiting colleagues from underrepresented groups and ensuring that they thrive in an environment that is free from racism and bias. We commit to supporting young, underrepresented persons in our community so that we can have greater diversity among physicians in our field in the future. We must do better. We will do better.
